Terms of Service

BTC Signal Terminal | Personal access to a hosted signals service

Version 1.6 | 19 November 2026 | Effective upon publication. Earlier purchase promises and mandatory rights are preserved.

> **ALL SALES ARE FINAL, SUBJECT TO REQUIRED LEGAL AND PAYMENT REMEDIES. The bot and DallenTrades resources are informational tools, not financial advice. Trade at your own risk. You make every trading decision; the bot does not execute trades. Access does not transfer ownership or guarantee results.**

1. Who provides the service

DallenTrades ("DallenTrades," "we," "us," or "our") provides the BTC Signal Terminal, dashboard, related DallenTrades resources, and any community benefits expressly included in your plan (the "Service"). DallenTrades is the supplier. Whop processes purchases and manages membership billing under its own terms. DallenTrades is the trading name used for the Service.

2. Agreement and eligibility

These Terms apply when they are made available before purchase or access and you affirmatively accept them. The checkout description, accepted Return and Refund Policy, and End User License Agreement also form part of your access agreement. Our Privacy Policy explains personal-data handling. You must be at least 18, able to enter a binding agreement, and legally permitted to use the Service where you live. Access does not establish eligibility to trade on any exchange.

3. What you are buying

You buy a limited, personal right to use the hosted features expressly included in the plan for its stated access period. You do not buy the bot itself, a software copy for independent operation, source code, ownership of an algorithm or model, a managed trading account, or a share of any business. Access is tied to the purchasing account and is not transferable, sublicensable, or resalable. Future features, experimental AI, custom integrations, or separate products are not included unless expressly promised at checkout.

4. Sign-in and account limits

Purchase your pass and sign in at https://dallentrades.com/member with the same Whop account. Linking Discord is optional for terminal access. To receive included VIP channels, join the DallenTrades server and link and confirm your Discord account. Each member may have one active terminal session and one connected tab at a time. The three-hour session limit starts when that login first accesses protected data. Refreshing the page or leaving it idle does not extend the limit. Signing in again gives access for the remainder of a valid pass. Do not share credentials, authentication codes, session tokens, or the paid feed. Tell support privately if you suspect account compromise.

5. Service and technical requirements

You need a compatible current browser, internet connection, and functioning third-party sign-in and payment accounts. The Service provides general market information and directional signals. It does not execute trades, take custody of money or cryptocurrency, or control your exchange account. A sign-in or exchange account by itself does not grant a paid membership.

> **Cancel renewal in Whop to stop future charges. You keep verified terminal access and any included Discord VIP access through the end of the period you already paid for. The 24-hour day pass expires automatically.**

6. Plans and renewal

Your checkout and receipt identify the selected plan, total price, additional disclosed charges, access duration, and billing dates. Standard prices are in US dollars: Day pass, $25 once for 24 hours from purchase, without renewal; Weekly, $40 every seven days until canceled; Monthly, $140 each month until canceled; Annual, $950 at purchase and $950 every year until canceled. Annual access is a recurring yearly subscription, not lifetime access or a one-time payment. The billing period and renewal date shown by Whop control calendar timing. Promotions apply only as expressly disclosed and accepted.

7. Authorization and changes to price

For a recurring plan, you expressly authorize recurring charges at the amount and interval shown at checkout until cancellation takes effect. Save your receipt and cancellation confirmation. New prices apply only as permitted by the accepted purchase terms, platform requirements, and law, with required advance notice and consent. Posting a different price does not retroactively change a completed purchase. We do not use these Terms to impose an undisclosed renewal or to shorten a previously purchased access term.

8. How to cancel

Sign in to the Whop account used for purchase, open your purchases or memberships, select BTC Signal Terminal, and use the manage/cancel subscription control. Complete the displayed confirmation and keep the record. If that route does not work, contact DallenTrades through Whop seller support or use Whop Help Center for assistance. You do not need to telephone us. Leaving Discord, closing the dashboard, deleting a bookmark, or simply not using the Service does not cancel billing. Cancel before the renewal shown in your account to avoid the next charge.

9. Canceling renewal and your paid-through date

When you cancel a weekly, monthly or annual renewal in Whop, future recurring charges stop. Your verified terminal access and any included Discord VIP access continue through the paid-through date for that membership. Cancel before the next renewal shown in Whop to avoid the next charge. An ordinary cancellation does not refund a valid charge or create a prorated credit. A day pass expires 24 hours after purchase without renewal. The specific terms of an earlier purchase and any rights or remedies required by law continue to apply.

10. Expiry, payment problems and processing delays

When a pass expires, its terminal and VIP benefits end unless another eligible paid pass covers you. A verified Whop refund request, refund or payment dispute revokes access under the affected membership. An ordinary support question about a charge is separate from a formal Whop refund request. Failed or reversed payments or an independent security issue can also affect access. Loss of the VIP role leaves free Discord membership and unrelated roles in place, subject to normal server moderation. Provider delays can affect when status changes appear. Contact support about errors. You retain your statutory remedies and right to make a good-faith payment dispute.

11. Previously purchased plans

The description and lawful terms accepted for an existing purchase determine its duration and billing obligations. The Annual subscription does not automatically replace an existing plan or convert a previous one-time purchase into recurring billing. Such a conversion requires your express agreement to the new price, term, and recurring charges. These documents alone do not authorize it. We will not retroactively redefine a previously advertised lifetime or other one-time offer. Changes to existing commitments require a lawful resolution and any consent or remedy required by the original agreement, platform rules, or law.

12. Educational information and your trading decisions

The member terminal and its charts, indicators, replays and guides provide general market information for education. UP, DOWN and WAIT describe a model outlook. A 5/5 rating means five internal checks supported a call when it qualified. It is not a verified probability of success. Signals can change or become unavailable. You decide whether, when and how to trade. The Service does not give personalized investment, financial, tax or legal advice, place orders, manage trading accounts or hold customer funds. Subscribing alone does not establish an adviser-client relationship or waive regulatory protections.

13. Trade at your own risk

You assume the market risks of trades you choose, subject to rights that cannot lawfully be waived. Bitcoin and event-contract prices can move rapidly. You can lose your entire stake or more where the product permits it. Flip Watch describes recent price movement. Whale Watch can show incomplete or hedged positions. Chart and order-book prices can be delayed and can differ from the price available for your order size or at another venue. Independently verify the instrument, target, executable quote, fees, liquidity and settlement rules. Seek qualified independent advice when needed.

14. How to read the Win Tracker and hypothetical returns

The Win Tracker measures whether a recorded direction was correct at settlement. Its displayed hypothetical ROI uses the lowest recorded ask after a call on winning rounds only and a modeled fee. It excludes losing rounds from the ROI display. A recorded price can be identified with hindsight, may come from incomplete quote history and may never have been available for your size. Fees, spreads, slippage and delays affect actual results. A profitable trade cannot be inferred from a correctly called direction. Pending rounds, no-calls, sample size and the reporting period matter. Corrections may change a displayed record. Past results do not guarantee accuracy, a minimum number of calls or future returns.

15. Use restrictions and preserved rights

Do not bypass authentication or payment checks; exploit security flaws; scrape or relay the paid feed; use another person's account; resell member access; or copy protected software or content to reproduce or offer a competing service without permission. Do not upload nonpublic software, credentials, or protected paid material to a public repository or an AI service for extraction, cloning, or redistribution. These restrictions are subject to applicable law and do not prohibit honest reviews, lawful independent development, factual criticism, legal advice, regulator reports, or reasonable evidence preservation. The EULA provides the detailed license limits.

16. Changes, interruptions and beta features

Feeds, hosting, authentication, payment systems, and internet connections can fail or be delayed. We may pause signals when data is stale, uncertain, or incomplete, and may maintain, repair, update, or replace features. Beta features can have additional defects and may not become permanent. We do not guarantee uninterrupted operation, zero latency, or an unchanging strategy. Material changes do not erase obligations to deliver the essential access already sold or any required remedy. We will provide legally required notice of material changes or discontinuation.

17. Suspension and fair enforcement

We may limit or suspend access for a material breach, suspected compromise, misuse, payment ineligibility, or a legal requirement. Where reasonable and safe, we will explain the issue and allow correction. You may request review through support. A security investigation or a good-faith complaint alone does not automatically forfeit statutory rights. Ending Service access does not authorize us to seize your trading funds or control your exchange account.

18. Limited warranties

TO THE EXTENT PERMITTED BY LAW, THE SERVICE IS PROVIDED AS IS AND AS AVAILABLE, WITHOUT IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. We do not warrant error-free data, reliable future signals, investment performance, or complete protection from every cyberattack. This clause does not override an express purchase promise, excuse deliberate misrepresentation, or remove a guarantee or remedy that the law does not allow us to exclude.

19. Limitation of liability

TO THE EXTENT PERMITTED BY LAW, DALLENTRADES IS NOT LIABLE FOR INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL LOSSES, INCLUDING LOST TRADING PROFITS, LOST OPPORTUNITY, OR BUSINESS INTERRUPTION, ARISING FROM THE SERVICE. Subject to section 20, our aggregate liability for all claims arising from the same or related events is limited to the greater of US$100 or the fees you paid us for the affected access plan during the 12 months before the event. For an affected one-time purchase, the cap instead includes the full price of that purchase if greater.

20. Rights the limits do not remove

The exclusions and cap do not apply to our fraud, intentional misconduct, gross negligence, liabilities that applicable law makes non-excludable, or refunds and remedies that cannot lawfully be limited. They do not restrict a customer's right to complain to a regulator, make a legitimate card dispute, bring a protected claim, or enforce a nonwaivable consumer right. Where an exclusion is not allowed, liability is limited only to the extent the law permits.

21. Responsibility for unlawful misuse

To the extent permitted by law, you are responsible for third-party claims and reasonable losses directly caused by your intentional unlawful misuse of the Service, knowing infringement of another person's rights, or deliberate account theft or redistribution. This does not require you to indemnify us for our own misconduct, your ordinary authorized use, unsuccessful trades, a truthful review, or a good-faith legal or payment complaint. We will provide reasonable notice and an opportunity to participate in the defense before seeking recovery under this section.

22. Disputes and governing law

Please contact support so we can try to resolve an issue. Doing so is encouraged, not a condition that prevents an urgent remedy, statutory complaint, or timely dispute. Applicable law governs this agreement, including mandatory protections that apply where you live. Claims may be brought in a court with lawful jurisdiction, preserving any mandatory right to a particular forum or available small-claims process. These Terms do not impose mandatory arbitration or waive class-action rights.

23. Policy changes and interpretation

We will identify updated policies and provide notice or obtain new consent when required for material changes. Revisions apply prospectively and do not reduce accrued rights or silently replace an earlier paid-term promise. Mandatory law controls; accepted specific purchase terms then control price, duration, and included benefits. The Return and Refund Policy controls refund handling, and the EULA controls software-license scope. If a provision cannot be enforced, the rest remains effective to the extent lawful. A failure to enforce once is not a general waiver.

24. Contact

Contact DallenTrades through its seller support chat on Whop, using the account associated with your purchase. You may also contact the DallenTrades owner privately in the official DallenTrades Discord server. If membership chat is unavailable, use Whop's Help Center at https://help.whop.com to locate seller contact information or request help reaching DallenTrades. Do not post personal or payment information in public channels.
